### ***Election/Restrictions***

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

**Group I, claim(s) 1-5 and 7-8, drawn to a semiconductor device.**

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The common matter of claims 1-11 is a semiconductor structure comprising terminals/lands on a mounting face, and conductors formed on said terminals/lands. Through investigation, the common limitations are known features, as disclosed by Figure (a) of Nakayama Yoshinori (PAJ 2001-332582) which is cited by the international search report as an X reference.

Therefore this common limitation is not novel. As a result, the limitation does not exceed prior art, and as a result of PCT Rule 13.2-2 this common matter does not have a distinctive technical feature. Therefore none of the claims has a common matter. There is no other common matter that can be considered a distinctive technical feature in the sense of PCT Rule 13.2-2, so there is no technical relationship in the sense of PCT Rule 13 between these inventions. Thus claims 1-11 clearly do not satisfy the requirement of unity of invention.
